Pilani, India

EDUCATION

Bachelor's of Engineering (Hons.) in Computer Science

BITS Pilani

Pilani, India

May 2017 - Present
Expected graduation in 2021

GPA - 9.51/10

SKILLS

Front-end Development

JavaScript

ReactJS

Redux

React Native

TypeScript

Webpack

Back-end Development

NodeJS

GraphQL

SQL

MongoDB

Programming

Python

Assembly

Dev tools

Git

Github

Adobe XD

Jupyter Notebook

MISCELLANEOUS

Languages:

English, Hindi

Interests:

Stock market investment, Portfolio management

Extracurricular:

Swimming, Table tennis

EXPERIENCE

Happiest Minds Technologies

P Bengaluru, India

Summer Intern

May - July 2019

- Accelerated the work on a project for the retail sector, based on Machine Learning and Image Processing.
- Developed web application using Flask (Python), NodeJS and Angular (JavaScript).
- Presented the product to an audience and grabbed the attention of potential customers for the company.

Inclusive Design Institute

www.kunal-mohta/gsoc-2018

Google Summer of Code 2018 Student

May - Aug 2018

- Developed a REST API that would bring together various services to help developers in building inclusive software with adaptive content.
- Taught myself **test-driven development** and implemented unit, integration and contract tests.

Freelance Web Developer

screenninja.in

ScreenNinja

Oct - Nov 2018

 Developed promotional and e-commerce website using JavaScript library ReactJS along with Redux, and Firebase at the backend.

PROJECTS

Wallet Web App

kunal-mohta/apogee-wallet

APOGEE 2019 - technical festival

E Feb - March 2019

- Built the front-end for the web application that facilitated client-vendor interactions at food stalls (like placing food orders).
- It was used in one of the largest inter-collegiate technical fests of India.
- Used technologies like ReactJS, Redux, SCSS.

Official introductory website

www.kunal-mohta/oasis-2018-intro

OASIS 2018 - cultural festival

July - Aug 2018

- Built the front-end for the official website of one of the largest inter-collegiate cultural fests of India.
- Used the newer **ES6 JavaScript** syntax, and **Webpack** as the build tool.

COMPETITIONS

AIC - Zulip

Campus-wide Runner Up

I March 2019

- Worked for the renowned open-source organization Zulip, solving some open issues on their Github repository.
- Most of the work required writing code in Python and JavaScript.
